---

Hello,

The labor coalition, [Climate Jobs Illinois](#), suggests that the Illinois Power Agency should have two waivers for the Minimum Equity Standard requirements for entities that received REC's through the Adjustable Block Program or through the IPA's utility-scale REC procurements. One waiver for union lead projects and one for non-union projects. Attached is an updated scoring table we suggest for a union waiver.

Thank you for your consideration. Please let me know if you have questions or need any additional information.

Best,  
Joe
